

CONNECTING STAKEHOLDERS IN PUBLIC HEALTH

The BSPH strives to create opportunities for interconnectedness and exchange between public health practitioners at the local, regional, and global level.

The MiG organizes a weekly policy exchange “Spree-stadtforum” that provides health policymakers in Germany’s capital with a platform to discuss and present recent developments and current challenges in health politics. The TU Berlin also hosts the largest annual public health conference “Health and Poverty” in Germany.

The IPH hosts the Berlin Epidemiological Methods Colloquium (BEMC) and corresponding Journal Club, providing health data sciences researchers with a bi-monthly opportunity for exchange. Additionally, innovative perspectives in modern epidemiology and public health are disseminated through the exceptional speakers at the biannual IPH Lecture Series.

WOULD YOU LIKE TO JOIN US?

Subscribers to our [mailing list](#) receive the BSPH newsletter, an overview of upcoming Intensive Short Courses, invitations to the “Spreestadtforum” and IPH Lecture Series as well as the BSPH graduation ceremony.

BERLIN SCHOOL OF PUBLIC HEALTH

The Berlin School of Public Health (BSPH) is a collaborative initiative of three universities in Berlin: Each of the partner institutions contributes its experience and expertise in the field of public health to the school's success. The board of directors along with dedicated faculty and staff ensure academic excellence and innovation in research.

- Alice Salomon Hochschule (ASH),
Department of Health Education
- Charité - Universitätsmedizin Berlin,
Institute of Public Health (IPH)
- Technische Universität Berlin (TU Berlin),
Department of Health Care Management (MiG)

BOARD OF DIRECTORS

Prof. Dr. Raimund Geene

Department of Health Education, ASH
Community health promotion and disease prevention,
family health

Prof. Dr. Dr. Tobias Kurth

IPH / Charité – Universitätsmedizin Berlin
Epidemiology and methodological expertise in health
data sciences, health outcome research

Prof. Dr. Reinhard Busse

Department of Health Care Management / TU Berlin
Health systems and policies, health economics, health
technology assessment, health services research,
global health

CONTINUING EDUCATION IN PUBLIC HEALTH

MASTER

The BSPH offers a joint, state-funded Master of Science in Public Health (MScPH) degree program that provides further education to graduates from a wide array of bachelor programs, in particular, the feeder programs in Health Sciences, Management, Social Work and Physiotherapy/Occupational Therapy offered by the three collaborating partners.

The BSPH hosts executive (tuition-based) masters programs in Epidemiology and Applied Epidemiology.

DOCTORATE

Doctoral degrees in the field of public health can be earned at the TU Berlin (Dr. PH) and at the Charité (Dr. rer. medic. and PhD in Health Data Sciences).

INTENSIVE SHORT COURSES

The academic programs at the BSPH offer a wide selection of Intensive Short Courses (ISC) open to the general public health research community. The courses aim to convey in-depth knowledge of emerging topics or specializations in public health and epidemiology. The target audience of the ISCs are masters and PhD students as well as public health professionals from all over the world.

INNOVATION IN PUBLIC HEALTH RESEARCH

Innovative research in the field of public health is needed to assess the impact of and find solutions for current challenges such as climate change, emerging infectious diseases and achieving universal health coverage. Public health research must develop new models for sustainable health system funding and create healthy living environments in an increasingly ageing, urbanized world.

Additionally, digitalization in healthcare provides new sources of health data and demands the development of new methods of analysis. The BSPH partner institutions have a wide array of research projects tackling these challenges.

SAVE THE DATE

The BSPH is hosting the 15th European Public Health Conference 9 - 12 November 2022 in Berlin
